I Description of Site: (Optional)

Describe the history and present conditions of the site. Give directions to the site and describe any nearby wells, springs, lakes, or housing. Include such information as how waste was disposed and where the waste came from. Provide any other information or comments which may help describe the site conditions.

Iron Foundry solid wastes were disposed of on-site for over a century. For an unknown period of time a portion of the site was used for above ground drum storage of chemical process wastes.

All on-site disposal and storage activities have been discontinued. Eight groundwater monitoring wells have been installed. Chemical analysis of groundwater from the eight wells and of water from Moon Brook upstream and downstream of the site (see map) indicate that there are no significant levels of toxic substances within the confines of the Howe Richardson property. Detailed reports of these analyses are enclosed.

J Signature and Title:

The person or authorized representative (such as plant managers, superintendents, trustees or attorneys) of persons required to notify must sign the form and provide a mailing address (if different than address in item A). For other persons providing notification, the signature is optional. Check the boxes which best describe the relationship to the site of the person required to notify. If you are not required to notify check "Other".
